**RE: Specialty Physicians Advancing Rural Care (SPARC) Act. (S. 1380/ H.R. 4681)**

Dear Senators Rosen and Wicker and Representatives Joyce and Ross:

On behalf of the thirty-eight undersigned physician organizations, we offer our robust support for the Specialty Physicians Advancing Rural Care (SPARC) Act. (S. 1380/ H.R. 4681). This bipartisan legislation would establish a new loan repayment program to incentivize specialty physicians to practice in rural communities and expand access for the millions of Americans who lack ready access to specialists.

The demand for specialty physicians throughout the United States far outpaces supply, especially in rural America. The country faces a shortage of 86,000 physicians by 2036 with an expected shortfall of 44,900 specialists.<sup>1</sup> According to the National Center for Health Workforce Analysis, no specialty currently has enough practitioners to meet patients' needs in non-metropolitan areas.<sup>2</sup> This shortfall is growing. By 2037, non-metropolitan areas will experience a 60 percent shortage of physicians; by comparison, metropolitan areas will experience a 10 percent shortage.<sup>3</sup> Predicted shortages for specialists in non-metropolitan areas range from 94 percent for neonatologists to 48 percent for emergency medicine physicians.<sup>4</sup>

While the availability of specialty medicine physicians is decreasing, the average amount of debt they carry is increasing. Sixty-seven percent of medical school graduates have medical school debt, with a median amount of \$200,000.<sup>5</sup> These factors make it crucial that Congress take action to help reduce the financial burden on young physicians and incentivize them to practice in those areas of the country with the highest need.

The SPARC Act would authorize repayment of student loans for specialty medicine physicians and nonphysician specialty providers of up to \$250,000 over six years in exchange for their service in rural communities experiencing shortages of specialty providers. This substantial time period will encourage these professionals to settle and grow roots in these communities, thereby fostering stable access to care.

We look forward to working with you and congressional leadership to advance and pass the SPARC Act during this 119<sup>th</sup> Congress.

Sincerely,
