The Honorable Chris Coons
127A Russell Senate Office Building
Washington, DC 20510

Dear Senators Schatz and Coons,

The undersigned organizations write to express our sincere thanks for championing the amendment to provide the Office of Management and Budget the flexibility to update its M-12-12 memo during the recent markup of the FY 2016 Financial Services and General Government Appropriations Act on July 23, 2015.

We greatly appreciate your strong support for science, technology, and innovation and for the many members of our organizations who are federal employees or contractors at agencies across a broad spectrum of scientific and technical disciplines.

We look forward to working with you further to find a solution that provides OMB the ability to update its guidance and ensures sustained transparency and accountability in federal spending without impacting scientific progress and innovation.

Sincerely,

The Honorable Barbara Mikulski
Vice Chairwoman, Senate Appropriations
Committee
503 Hart Senate Office Building
Washington, DC, 20510

Dear Chairman Cochran and Vice Chairwoman Mikulski,

The undersigned organizations write to express our sincere thanks for highlighting the importance of ensuring that federally employed and contracted scientists and engineers are able to attend mission-relevant scientific and technical conferences during your recent markup of the FY 2016 Financial Services and General Government Appropriations Act on July 23, 2015.

We greatly appreciate the recognition that existing policies are reducing government scientists' and engineers' participation in scientific and technical conferences to the detriment of society as a whole, which benefits from innovations resulting from interactions at these conferences. As highlighted, scientists and engineers at federal agencies, labs, and research institutions currently face significant barriers to attend conferences, which have in turn driven significant increases in the administrative costs of overseeing these activities. Since the implementation of OMB Memo M-12-12, it has become clear through GAO and National Science and Technology Council reporting that existing regulations need to be revisited.

We look forward to working with you further to find a solution that provides OMB the ability to update its guidance and ensures sustained transparency and accountability in federal spending without impacting scientific progress and innovation.

Sincerely,
