

ENDOCARES

FEBRUARY 20-21, 2021

JOIN US ON SATURDAY, FEBRUARY 20 AND SUNDAY, FEBRUARY 21 FOR ENDOCARES 2021, A FULLY VIRTUAL HEALTH FAIR PRODUCED BY THE ENDOCRINE SOCIETY THAT WILL HELP SUPPORT THOSE LIVING WITH OR AT-RISK FOR TYPE 2 DIABETES AND OBESITY. OUR STATE-OF-THE-ART ONLINE PLATFORM WILL CONNECT TYPE 2 DIABETES AND OBESITY PATIENTS DIRECTLY WITH HEALTHCARE PROFESSIONALS AND PROVIDE THEM WITH HELPFUL MEDICAL RESOURCES TO BETTER MANAGE THEIR HEALTH.

WHO SHOULD ATTEND?

More than 30 million Americans are living with diabetes, with an astounding 7 million of them yet to be diagnosed with the disease. EndoCares 2021 focuses on individuals living with type 2 diabetes, as well as those at-risk for diabetes or obesity. If you or someone you know is dealing with complications related to diabetes or obesity, recommend that they attend EndoCares!

GET ANSWERS TO YOUR BIG HEALTH QUESTIONS

We have developed the EndoCares 2021 program with the most common questions from patients living with type 2 diabetes regardless of where they are in their diabetes journey.

- How do I avoid developing type 2 diabetes without changing everything about my lifestyle?
- How do I manage my type 2 diabetes without changing everything about my lifestyle?
- Should I be worried about something other than type 2 diabetes?
- What do I need to know (and do) about diabetes + COVID?
- Do I really need my diabetes medication?

Answer these important questions and more through our 30, 60, and 90-minute content tracks, aimed at delivering key resources and information on how to live a healthier life regardless of how much time you can spend at the event.
